

MORPHEAN

OPEN DOORS IN THE CLOUD

INTEGRATED VIDEO SURVEILLANCE
AND PHYSICAL ACCESS CONTROL

SECURITY AS A SERVICE

Managing security doesn't have to be costly or complex and can be made easy with an integrated video surveillance and access control solution. **The VIDEO-PROTECTOR Access Control Solution** can grow as your business grows, starting with a single door and growing to multiple sites easily whenever you like via our as-a-service model. The system gives you the ability to manage who goes where, when and view surveillance video linked to access events for quick, easy investigations allowing you to keep employees and assets secure.

OUR EXPERTISE

By providing a whole service we are able to provide a high-performance solution through our as-a-service model, which can simply manage single or multiple sites centrally. Whether you choose to have your solution fully or partially managed by a service provider, this saves you the worry of whose reasonability it is to deal with the necessary administration, and with no complex installs or upgrades to worry about, managing the system couldn't be easier.

SECURITY
SMART AND PROACTIVE SOLUTIONS

Standard physical access control solutions can be costly and timely to administer and require locally installed hardware to run the solutions. Utilizing latest cloud technologies we bring our customers a smart solution that overcomes all the issues that can arise. As a fully hosted solution it allows customers to have their solution easily managed and maintained by their expert service provide to offer true Security-as-a-Service, fully secured and backed up to offer maximum up time. This allows the customers to concentrate on their own work, safe in the knowledge they are safe and secure. By taking an active role in the process, our solution is able to make security management meaningful and efficient.

MANAGEMENT & OPERATIONS
ACCESS CONTROL AS A SERVICE

By providing security as a service, our solution frees administration and IT resources for the customers' core business. It overcomes the expensive costs of local hardware and maintenance of servers and makes access management easy. We can ensure full protection of our customers' environment by integrating to any alarm receiving center 24/7 or out of hours. This allows your service provider to perform task efficiently and cost effective on your behalf such as remote deliveries, concierge, ID card printing and administration. We work with enterprise level safe and secure data centers to make sure privacy and security are of the highest standard.

WHY MORPHEAN

- European leader relying on Swiss quality
- Unique solution that improves security, optimises operations and gives access to business intelligence
- Security as a Service for a flexible and affordable solution
- Easy access to cutting edge analysis technology
